

- ▶ Game-changing 500kcal per serving mass gain formula
- ▶ Zero bloat or digestive issues
- ▶ Mass Chaser mixes with just 4oz of water to ultimate convenience

For years we had calls to enter the weight gain market, and for years we resisted. Our preconditions were simple: we'll only enter if we find a unique angle to differentiate ourselves from the bloat. I think it's fair to say Mass Chaser is the gatecrasher we've all been waiting for.

At 500kcal per serving, it mixes with a simple 4oz of water per serving. The end product is more akin to a shot than your traditional, clumpy, bloated mess that currently saturates the market.

Available from all good retailers. For stockists please visit www.ProjectAD.me

MASS CHASER

We're confident that once you try Mass Chaser, you'll never, ever waste your time vigorously shaking shaker bottles everywhere you go and gagging on clumped, chalky messes. Mass Chaser is 500 quality calories per serving that has game-changing implications for the hardcore mass-seeker looking for convenience.

Getting swole isn't rocket science. You progressively lift heavier sh*t and increase the amount of calories you consume to fuel growth.

The first part comes naturally to most with the right attitude. It's fun smashing PR's on deadlifts, squats and bench each week - that's a given. But force-feeding yourself calories? That sucks, and it's not exactly fun when most of the formulas on the market taste like dog crap.

UNTIL NOW

AD's Mass Chaser is a genuine game-changing formula. 500 calories per serving, without the bloat, clumped up mess currently dominating the market. It's smooth and mixes seamlessly with just 4oz of water, and is genuinely delicious.
